**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: prior art of record does not teach or suggest, either alone or in combination, the limitations of claims 1-14. Specifically, prior art of record does not teach a data bus system comprising an external access bus, an internal access bus, and "an internal memory test bus used when data is output from the internal memory unit and input to the I/O unit" and wherein "the periphery circuitry is connected only to the internal access bus, the internal access bus is connected to the external access bus with a latch". Examiner notes that applicant's arguments indicating that a single bus cannot be artificially divided into multiple buses are persuasive. Accordingly, the buses as claimed by applicant are interpreted to have distinct features that would prevent them to be regarded as a single bus, or merely a connection between devices to exchange data. Furthermore, "connected" is interpreted to mean "directly connected" as the periphery circuitry is clearly connected to the CPU, I/O circuitry, and the memory unit through the internal access bus (figure 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
